

On Demand Software Testing

Overview: On Demand Testing is ideal for systems under development and production. On Demand Testing for applications provides on demand functional and performance testing to help make quality assurance affordable. Our testing services are based on source-when-you-need and pay-as-you-go model. Manual, automated, functional and performance testing is performed using industry-leading tools such as Mercury, Compuware, Silk, and other open source testing tools. QA Lab (An ISHIR Company) is a SEI CMMi Level 3 company.

Clients: Airtel, Boy Scouts of America, Citibank, Dallas Mavericks, Frito Lay, GE Money, GlaxoSmithKline, GM, InterGlobe, Microsoft, Motorola, PepsiCo, PKF, Samsung, Thomson, Venue, Virtuoso, Wrigley, XM Radio, Yahoo!

Services

Services: QA Lab (An ISHIR Company) offers independent QA and On Demand Testing Services spanning the entire software release lifecycle. Our approach to application testing enables IT to integrate On Demand testing to any stage of the lifecycle and provide visibility into project quality, ensuring that IT delivers projects on-time, within budget, and with expected levels of quality. Our On Demand Testing services help you deliver your software with confidence and compete better in the market. This includes but not limited to formulating the test plan & test cases, execution, defect reporting, defect analysis, risk assessments and recommendations.

Software Verification & Validation:

- Black Box/Functionality Testing
- Unit Testing
- End to End Testing
- Regression Testing
- Configuration/Compatibility Testing User
- Acceptance Testing (UAT) Installation/
- Integration Testing Security/Vulnerability Testing
- White Box/Structural Testing
- Usability Testing
- Internationalization/Localization Testing

Test Automation:

- Automated Testing
- Implementation

Performance Engineering Services:

- Load Testing
- Endurance Testing
- Spike Testing
- End to End Transaction Testing
- Performance Tuning Architectural
- Benchmarking Capacity Planning
- 24x7 Monitoring Service Performance
- Consulting

Software QA & Process Consulting:

- Process Consulting
- Test Strategy & Management Gap
- Analysis
- Training
